Practical - 2

Leaves

1. Arrangement - alternate / opposite and decussate or whorled
2. Type - Simple or compound

When simple - shape - (elliptic, ovate, etc) size,
apex - acute, etc

margin - entire, etc

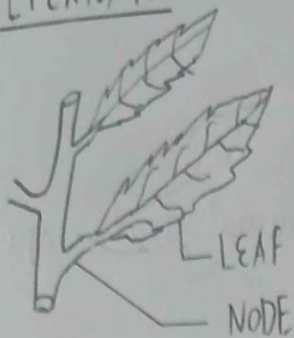

bases - oblique, etc

When compound - pinnate, paripinnate, imparipinnate^{pl} or palmate.

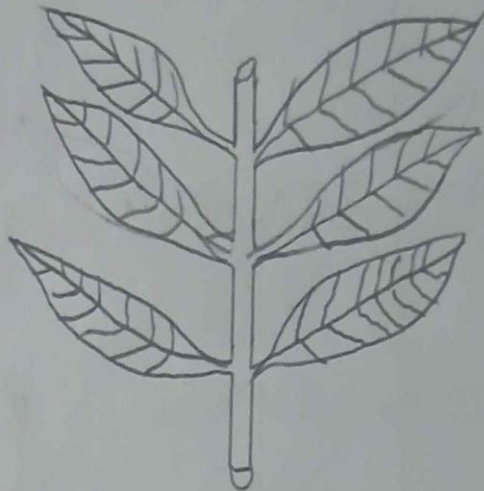

Pinnate - unipinnate or bipinnate or tripinnate, decompound, palmate - no. of foliate depending on the no. of leaflets

3. Texture coriaceous, fleshy, papery, etc
4. surface glabrous, tomentose etc
5. venation reticulate or parallel, unicostate or multicostate
6. petiolate or sessile
7. stipulate or exstipulate (type of stipule)

(1) ALTERNATE

(2) OPPOSITE

(a) OPPOSITE & DECOSATE

(b) OPPOSITE & DISTICHOUS

(3) WHORLED

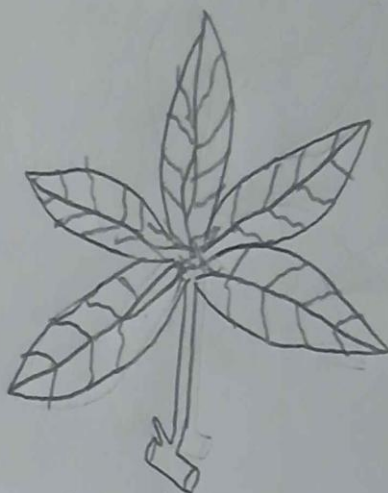

II. LEAF TYPE

Simple

Pinnate compound

Palmate compound

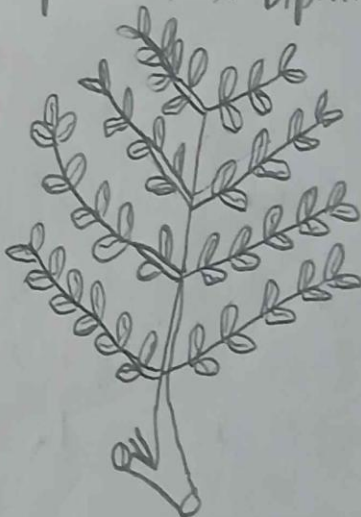

(When unipinnate = par. (or) impari pinnate) or bipinnate

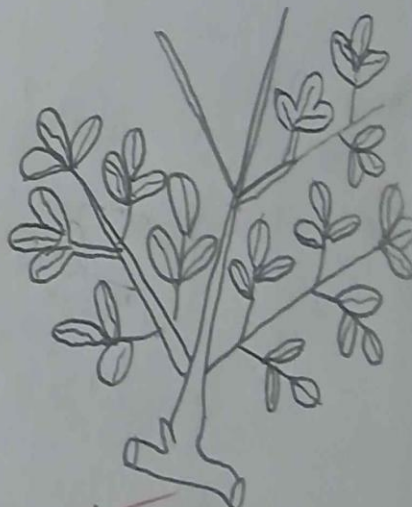

pari-pinnate

impari-pinnate

bipinnate

tripinnate
